Problem

Problem

Is possible to execute a Jabuti DSL smart contract ?

No, it isn't

How to execute a Jabuti DSL smart contract?

Option 1: building a runtime

Option 2: transforming it in an executable language

Why option 2 is the best option?

- Validated environment
- Faster development
- Allows more possibilities of use cases

Solution

Jabuti CE

Jabuti CE v0.0.5
Applied Computing Research Group (GCA) | 10 | ★★★★★
Provides a set of features to support writing smart contracts in Jabuti DSL
Disable | Uninstall | Auto Update

<https://marketplace.visualstudio.com/items?itemName=gca-unijui.jabuti-ce-vscode-plugin>

Main Features

Code highlighting

```
discount-coupon-late-delivery.jabuti > ...
1  contract DiscountCouponLateDelivery {
2
3    dates {
4      beginDate = 2024-06-06 00:00
5      dueDate = 2024-06-10 23:59
6    }
7
8    parties {
9      application = "Delivery App"
10     process = "Integration Process"
11   }
12
13   variables {
14     totalPurchaseAmount = MessageContent("sum($.[*].value)")
15     deliveryDate = "$.deliveryDate"
16     expectedDate = "$.expectedDate"
17   }
18
```

Main Features

Autocompletion

```
obligation purchasesGreatherThan300USD {  
  rolePlayer = application  
  operation =   
  terms {  
    MessageCon  
    MessageCon  
  }  
  onBreach(log("[300USD] the delivery date was later than the expected date"))  
}
```

You, 4 weeks ago • Uncommitted changes

- poll
- push
- read
- request
- response
- write

Main Features

Syntax and semantic validation

```
contract DiscountCouponLateDelivery {  
  dates {  
    beginDate =  
    beginDate is required Jabuti Language  
  }  
  The begin date of the contract.  
  Allowed patterns:  
  yyyy-mm-dd HH:mm  
  yyyy-mm-dd HH:mm:ss  
  Examples:  
  2024-10-16 16:22:45  
  2024-10-16 16:22  
  View Problem (Ctrl+K N) No quick fixes available  
}  
  
clauses {  
  obligation purchasesBetween100USD300USD {  
    rolePlayer = application  
    operation = response  
  }  
}
```

Main Features

Documentation on hover

```
contract DiscountCouponLateDelivery {  
  dates {  
    beginDate =  
  }  
}  
  
clauses {  
  obligation purchasesBetween100USD300USD {  
    rolePlayer = application  
    operation = response  
  }  
}
```

beginDate is required Jabuti Language

The begin date of the contract.

Allowed patterns:

- yyyy-mm-dd HH:mm
- yyyy-mm-dd HH:mm:ss

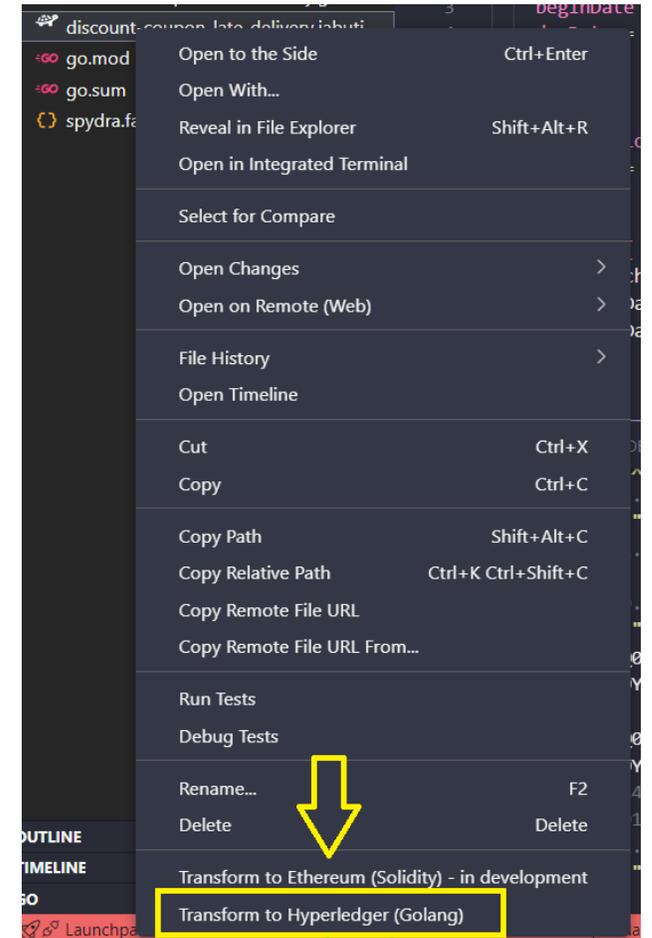

Examples:

- 2024-10-16 16:22:45
- 2024-10-16 16:22

View Problem (Ctrl+K N) No quick fixes available

Main Features

Transformation

EXPLORER

discount-coupon-late-delivery.jabuti X spydra.fabric

discount-coupon-late-delivery.jabuti > ...

```
1 contract DiscountCouponLateDelivery {
2   dates {
3     beginDate = 2024-01-01 00:00
4     dueDate = 2024-12-31 23:59
5   }
6
7   parties {
8     application = "Delivery App"
9     process = "Integration Process"
10  }
11
12  variables {
13    totalPurchaseAmount = "sum($.[*].value)"
14    deliveryDate = "$.deliveryDate"
15    expectedDate = "$.expectedDate"
16  }
17
18  clauses {
```
