

Are we doing better than in the 90s? (panel)

Johan Blok, Arjan Oortgiese and you ;)

Before we start

- This is an experiment 🧪
- You are the panel! Please join the discussion
- Strong opinions are ok, but remember respect is everything

‘Model’ your domain in a natural language or a diagram, why stick to a rigid language?

What’s the value of modelling in a language with fixed semantics when every user can ‘model’ in natural language?

What is the main topic for LangDev 2027?

How does our world look like over one year?

How do we get to a higher abstraction level?

Is this even possible? What does this even mean?

Let's talk about the elephant in the room 🐘

In the time of LLMs, are we still relevant? Is building a knowledge model needed when users can just prompt to create applications

Yet Another Language Workbench?

Tooling is important and a success factor, but...

Let's conquer the world 🏆

How can we scale up so that more engineers start doing MDSE?

Is a web based (Microsoft) Access not our dream?

Why are we using a lot of database examples that could be solved perfectly with Access in the 90's.

Your input ;)

If you dare
